

Michael Walker (1009130913)

Michael Kim (1009201114)

Orhan Cangurel (1009339226)

CSCB20 Assignment 3 Report

Working Features:

- Navigation through pages handled by Flask.
- Complete database for account information, grades, and feedback.
- Account registration and login.
- Different account types (student and instructor).
- Access to different website sections according to login status and account type (course information only available to those who are logged in, students can't change grades or view feedback, instructors can't send feedback).
- Template.html with a header, block for content, and footer.
- Students can view their grades and only their grades.
- Instructors can assign grades to certain students. Updates are stored in the database.
- Students can send regrade requests.
- Students can send feedback to specific instructors in the database.
- Instructors can view feedback that students left for them.
